In the lab this week...

Senior students carried out a hands-on heart dissection to explore the wonders of anatomy! They gained a better understanding of how these essential organs function to keep us alive as they dissected the heart.

Year 10 Presentations

Year 10 students present their dream careers to their year group every other week. They search for a person they admire and explore their career pathways.

Year 9 exploring Chemical Changes

FANTASTIC WORK FROM PREP STUDENTS

U14 FOOTBALL TEAM

Fantastic 8-2 win for the year 9 and 8 boys against King Alfred School. Player of the match was David, well done!

CONGRATULATIONS TO OUR U14 NETBALL TEAM

Congratulations to our U14 Netball Team, who won against Mill Hill school. The girls showed remarkable resilience, determination and fantastic teamwork on a lovely sunny afternoon. Player of the match was Alcia, well done.

Year 3 and 4 created their own Stone Age crafts for homework and presented them to the class. Some children made Stonehenge out of various materials, some made Stone Age houses using natural materials from their gardens. We also had a clay pot and some flint tools carved from soap as well as some cave paintings of animals.

Model United Nations Conference

Our KS4 students of the MUN club took part in the West London Model United Nations (WLMUN) Conference. With rigorous research and hard work mastering public speaking, using diplomatic language and improving their debating skills, our students confidently represented their countries as delegates in a conference that connected 300 students from 23 London schools.

In committees such as UN Women, UNICEF, Crisis Committee and the Security Council, students debated the topics of Protecting Children Online, Child Refugees, Juvenile Justice and Girls' Access to Education. As young people of today, they contributed to finding solutions for young people of the future.

The NLGS delegations represented Israel, Lebanon and the Democratic Republic of the Congo. They exercised their conflict resolution skills, cooperation and collaboration to make alliances with other countries and to avoid war in this fun simulation exercise. In the end, the committees came up with impressive resolutions that were presented to the MUN Secretariat.

International Day of Women and Girls in Science

Susie Orbach

A conversation with Susie Orbach

Susie Orbach is a British psychotherapist, psychoanalyst, writer and social critic. In her first book, *Fat is a Feminist Issue*, she examined the psychology of overeating and dieting in women. She has fought against the media pressure on young girls to be self-conscious about their appearance.

She is the author of thirteen books. Her book *Bodies*, won the Women in Psychology award for best book. She frequently contributes to the press and has published numerous papers. She wrote a column in *The Guardian* for ten years. She is the recipient of the first Lifetime Achievement Award for Psychoanalysis given by the British Psychoanalytical Society.

We are honoured to have Susie talk to our students and share her expertise. Our students had the opportunity to converse with Susie one-on-one and ask questions. She shed light on some of the struggles and obstacles in the 21st century. What a brilliant discussion!
